EXPERIENCE

Mid Level Flutter Developer

Asterisk Hubs / Sanepa, Lalitpur, Bagmati State, Nepal / December, 2023 - Present

Developed a healthcare application integrating features such as Auth0 authentication, real-time chat functionality, FHIR resource management, digital document signing, and Aidbox implementation.

Senior Flutter Developer

Tuki Soft Pvt. / Srijana Chowk,Pokhara / June, 2023 - December, 2023

Designed and engineered a comprehensive suite of applications encompassing a hotel booking platform, as well as integrated solutions for food, grocery, and ride-sharing services.

Freelance Flutter Developer

January, 2023 - June, 2023

Projects during my freelance tenure included a user-friendly Medical Queue App for streamlined appointment scheduling, a comprehensive Cash Book App for seamless financial management and a UI design for a Share Market Application.

Junior Flutter Developer

Dioralabs / Australia (Remote) / March, 2022 - December, 2022

- Developed the front end of an e-commerce app using Flutter, integrating seamlessly with APIs.
- Enabled vendors to create shops and add products, improving the user experience by streamlining the verification process.

PROJECTS

Rideon

Rideon is a healthcare app supporting System Admin, Organization Admin, Practitioner, and Supplier roles. It features organization management, order processing, document signing, and includes chat, FHIR integration, and Auth0 authentication.

MeroAto

An all-in-one platform for food delivery, grocery shopping, and ride-sharing. It offers a user-friendly interface with secure payments through Khalti.

Pauna

A hotel booking app with real-time bargaining for personalized deals, offering a user-friendly interface, diverse accommodation options, and transparent reviews.

KhojNet

An e-commerce app where vendors list products post-admin verification, enabling customers to purchase them.
